A Customized
Digital Library for
Emerging Readers

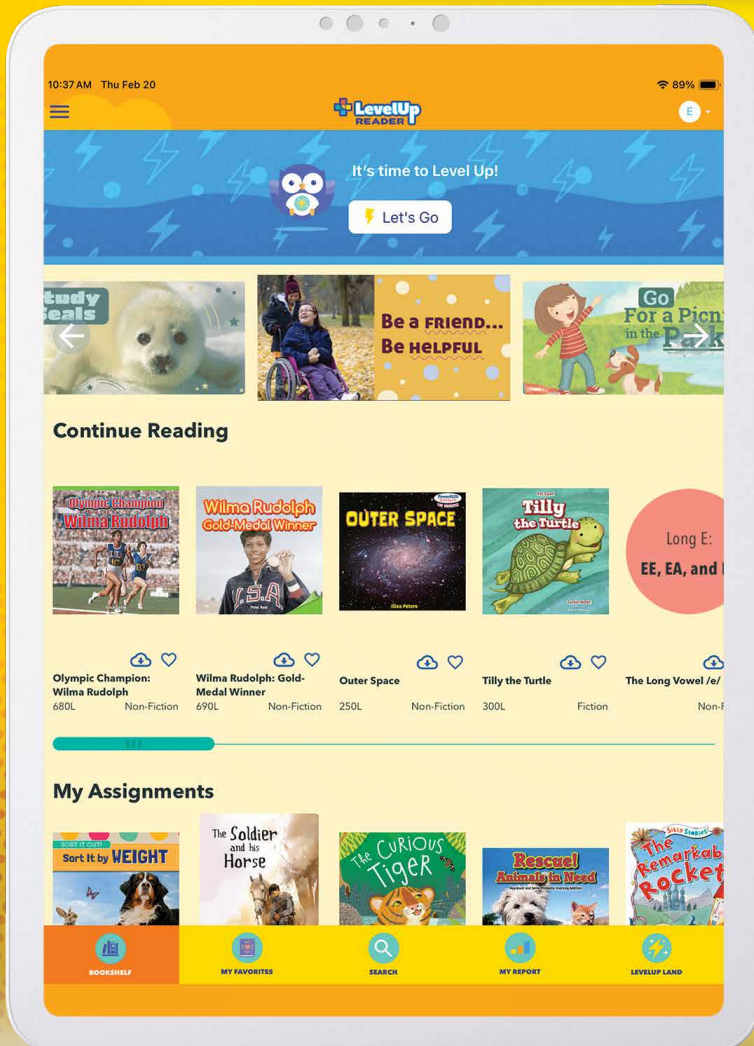

Developing Skilled Readers from the Foundation Up

Foundational Literacy

A robust adaptive reading platform that brings educators and students to one engaging resource to foster students' literacy growth

Grow Up with LevelUp

⚡ Quick Start Guide ⚡

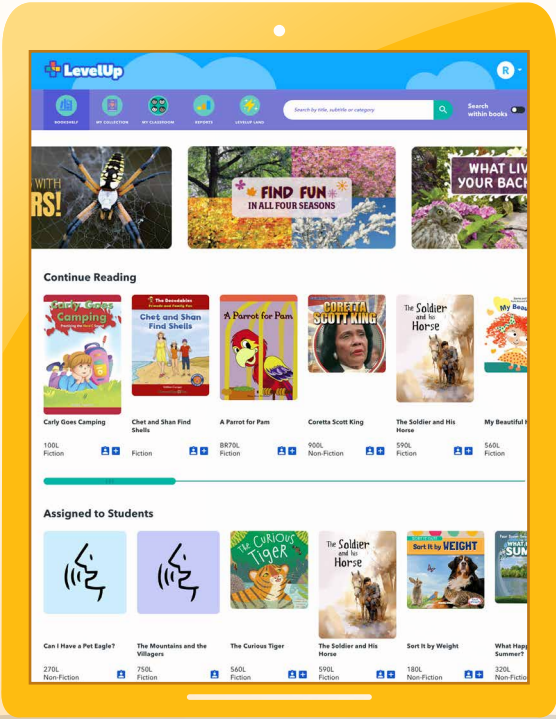

Quick Start Guide

Welcome to LevelUp!

This guide provides you with the essentials to get started with your teacher login. First, go to levelupreader.com. Enter your username and password to see your personalized bookshelf.

A navigation bar at the top of the page takes you to the main sections of LevelUp: Bookshelf, My Collection, My Classroom, and Reports.

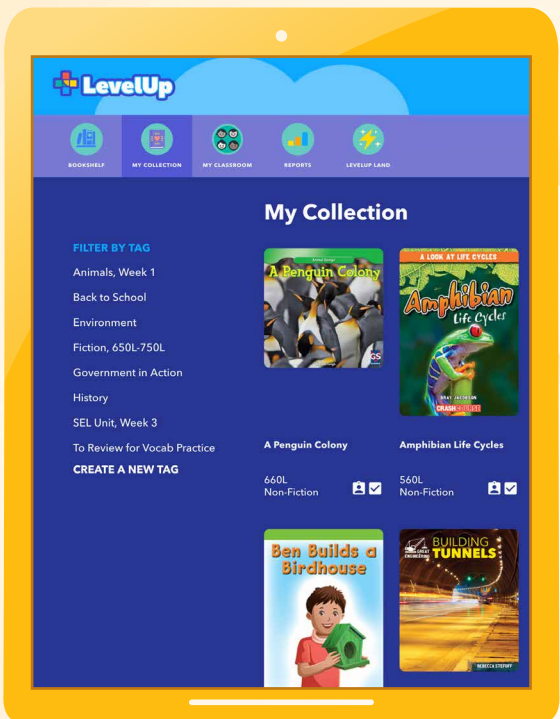

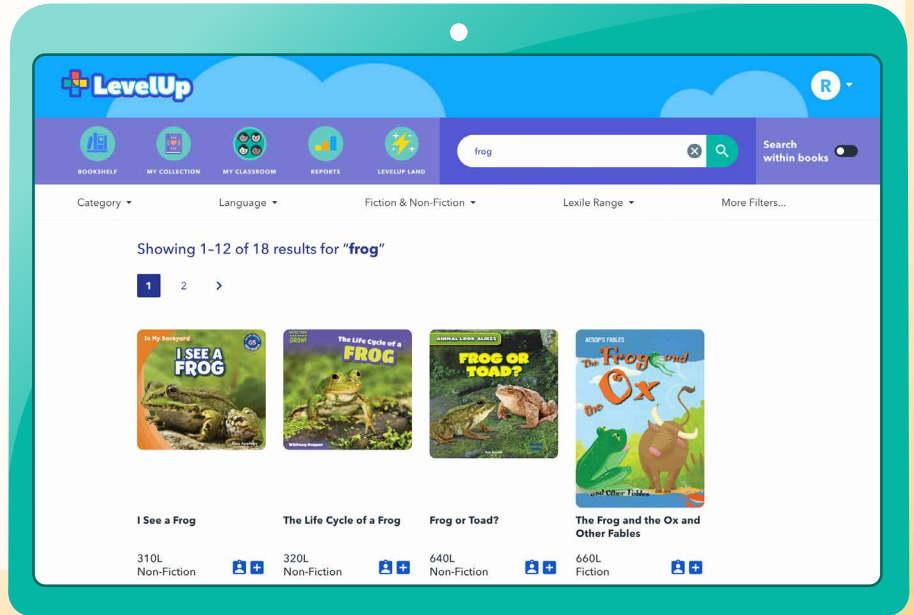

The Bookshelf is organized into scrolling carousels. Carousels offer books by interest or type (science books, phonics books) or books based on your usage (books assigned to your students, books you have yet to complete).

Click any book cover to see more. The resulting window shows the book's Lexile measure, page count, and other details. Toggle between English, Spanish, or bilingual versions of the book. Browse resources like graphic organizers and lesson plans. Access printable versions of the book in different sizes. Assign the book to students and track their progress.

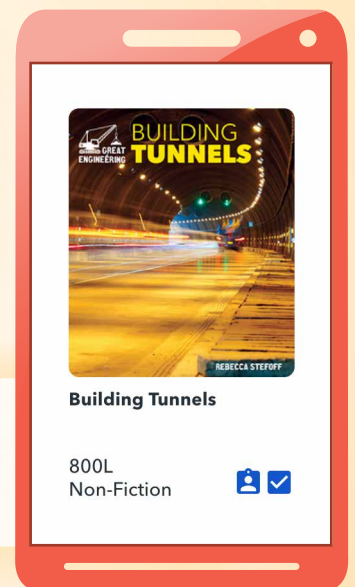

Use LevelUp's Search feature to discover resources. Powerful filtering helps you find exactly the resource you need. Narrow your search by language, Lexile measure, fiction vs. nonfiction, page count, book audio length, or topic and category (such as Fantasy or My Community).

Every book includes a comprehension quiz that assesses multiple skills and state standards. The advanced filters menu allows you to assign resources that will get you exactly the data you need. Do you have a student struggling with "main idea" comprehension? Select that filter to see books that include quiz questions assessing that particular skill. Standards filters, which populate with your state ELA standards, work the same way.

My Collection is a place to access favorite books you have saved.

On your Bookshelf, icons below each book allow you to quickly assign or save books.

<input type="checkbox"/> Krieger, Molly	1005L	Primary	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	

My Classroom contains an interactive class roster with tools allowing you to control the audio and read aloud functions. LevelUp discerns reading level with periodic assessments, but teachers can also trigger assessments as they see fit. Control the frequency of comprehension quizzes and whether quizzes contain constructed response items. Organize your students' bookshelf rows. Monitor student progress on assignments. View student constructed responses, listen to read aloud recordings, and score students running records in your inbox. Sort students into reading groups. Control student access to the game environment.

The Reports section offers insights on student usage and performance. Powerful filtering allows you to sort data by date, reading group, and language. Graphs and charts illustrate student and class reading level progress according to Lexile reader measures. See data on books read, quizzes taken, and time spent reading. Monitor reading growth and pinpoint instructional needs by reviewing students' mastery of comprehension skills and state ELA standards. Snapshots of data allow you to spot trends, while the ability to drill down into the data—including seeing individual student answers on quiz questions—offers deeper understanding.
